EBUBE ONWASIGWE

Contact Information: 803-387-2611 eonwasigwe@yahoo.com. Location: North Brunswick, NJ

Professional Summary:

Dynamic Clinical Research Scientist with seven years of preclinical and clinical research trial experience (Phase 1, 2a and 3). Demonstrated expertise performing research feasibility, data collection and analysis, investigative procedures verification, project management and report preparation. Proven medical knowledge and skilled at researching global health issues such as cancer, cardiovascular diseases, diabetes, gastroenterological, epidemiology, outcome research metabolic and pediatric disorders to provide effective interventions to improve patient overall health. Solid academic preparation as a certified clinical research associate, and clinical research scientist with solid knowledge of Standard Operating Procedures, FDA, ICH, GCP, and TPD regulations and guidelines for conducting clinical trials.
Advanced comprehension of inflammatory/immunology disease states, clinical pipeline and regist ration pathways. Eventually, I would like to use my skills as an investigator to develop better drugs and innovative procedures of treating chronic diseases and preventing the development of irreversible disease conditions (cancer, metabolic, autoimmune diseases) from developing and progressing.

Education:

Doctorate degree (PhD)
2014 – 2017
Alabama A&M University
Biochemistry

Master's in clinical nutrition
2012 – 2014
South Carolina State University

Doctor of Medicine (MD)
2005 – 2011
University of Debrecen/Medical and Health Science Center (Certified to practice in European Union Countries)

Career Experience:

Clinical research scientist (clinical development)

ExecuPharm Merck, King of Prussia, PA

01/2021- present

- Contribute to the execution of assigned clinical study(ies) in close collaboration with lead study MD and Clinical Operations, and for earlier stage assets, with non-clinical experts, to include safety oversight, trial conduct in accordance with protocol, review of emerging data, etc.
- Contribute to, as relevant, the preparation of documents including protocols and protocol amendments, preparation of statistical analysis plan(s), preparation of abstracts/posters/manuscripts, and presentations, collaborating with internal and external contributors; write original content as appropriate.
- Participate in the review, analysis, interpretation and presentation of accurate study results, including preparation of investigator brochure, annual safety reports, clinical study reports and other documents associated with regulatory submissions.

- Provide guidance and review of medical data, reconciliation of adverse events between sponsor and site databases, train research staff on reporting adverse events/events of clinical interest.
- Build deep knowledge of the therapeutic area(s) relevant to Merck, including current medical practice, existing Merck development programs and study results, competitive intelligence, etc, in order to effectively support Medical Affairs and Business Development with data and information requests.
- Experience revieing data and analysis using platforms such as EDC InForm and JReview.
- Undertake literature searches and summaries; remain up to date with scientific advances; maintain or oversee maintenance of Allena electronic library. Support investor relations initiatives in providing competitive landscape summaries/briefings.
- Provide support for Advisory Board meetings, regional scientific meetings, investigator meetings, etc, including preparation and/or delivery of presentations; working closely with relevant stakeholders.
- Cultivate and/or support relationships with external partners such as clinical investigators, clinicians, and scientists in support of trial execution and business development

Biologics Associate Team Lead

Bristol Myer Squibb, Summit NJ

09/2019- 01/2021

- Supporting the scientific, technical and operational efforts within analytical Sciences regarding analytical method trending and performance, validation, compendial method qualification, technology transfer and life cycle maintenance.
- Currently working on upscaled production of drug substances and drug products for commercialization through conducting studies (release, stability, forced degradation) that test drug potency and efficacy over time.
- Maintained database of analytical testing data from all external labs, track method performance and analytical deviations in quality system.
- Providing technical oversight and ownership of analytical methods, method revisions and improvements.
- Worked on an early phase 1 study (PoC) support for a biologic pharmaceutical for treating colorectal cancer.
- Shared responsibility for the group's scientific and technical standards, critical review of documentation and reports, and setting analytical strategy to support product development.
- Delivered timely data and process knowledge needed to meet Celgene project milestones and associated regulatory requirements.
- Participated in internal development programs and in external collaborations by representing the analytical development organization as needed.
- Working with CROs, proficiency in data interpretation, and sound organizational skills.
- Experience working with TMF (trial master file), Veeva vault platform, Electronic Lab Notebook (ELN), eTMF (Electronic Trial Master File) Outlook, SharePoint, and JMP.
- Getting drug Reblozyl approved by FDA for treating myelodysplastic syndrome and beta thalassemia.
- Managing change controls and deviations in our electronic management system.
- Currently working with clinical scientists on a pharmaceutical agent RPC-4046 for treating multiple myeloma in Phase 2 of clinical trial.
- Promotional review of literature on different assays to improve sensitivity of testing for impurities and potency of pharmaceutical drugs.
- Work collaboratively with the clinical trial team on Phase II to phase IV.

10/2018- 08/2019

Research Scientist

Celgene, Summit NJ

- Worked in a pharmaceutical company focused on treating hematological/oncological disorders (beta thalassemia and myelodysplastic syndrome) using Luspatercept (Drug substance and drug products) for phase I-III clinical trials.
- Reviewed work of other writers (in-house or consultant) for accuracy, quality, focus, and adherence to format and stylistic requirements, review data to determine the appropriate tabular and textual formats, and the clarity, logic and order of presentation
- Experience working with CROs, proficiency in data interpretation, and sound organizational skills.
- Experience interfacing with multiple teams, and proven ability to problem solve and identify inconsistencies or inaccuracies in data listings
- Performed DIR (Data Integrity Review) on technical reports, IMPD (Investigational Medicinal Product Dossier) and new BLA (Biologics License Agreement), MAA (Marketing Authorization Application), clinical summaries for blood cancer/hematological drugs.
- Experience with medical information activities such as compendia reviews, literature summaries for annual reports.
- Understand and follow HIPAA, OSHA, and safety guidelines as described in their respective guidelines.
- Worked on upstream and downstream process development of drug substances adhering to the appropriate CPP, CIPC, IPC, and the various stages of drug manufacture.
- Data trending of various units of operation in drug substance manufacture to maintain critical quality attributes of drug substances.
- Established and fostered professional relationship with KOL and ensured access to current scientific information on drug characterization studies.
- Written and reviewed stability summary reports, technical reports and protocols for drug product development using Veeva Vault.
- Sample management (labelling and shipping). This entails preparing samples for shipment, creating sample submission forms, and coordinating with lab services for sample pickup and shipment both within and outside the United States.
- Provide data verification and documentation support to ensure alignment of the master sample plan with GMP documentation such as protocols and batch records, and laboratory information system (LIMS)
- Maintain and enforce sample management workflow and processes. Support ad-hoc, supplemental sample requests utilizing a paper-based or electronic sample request workflow; coordinate with sample requestor and manufacturers on ad-hoc/supplemental sample requests
- Adherence to good manufacturing practice (GMP) and good laboratory practices (GLP), Standard Operating Procedures (SOP) and experience working in a clinical research laboratory setting.
- Worked in the scientific area of analytical development, process performance qualification (PPQ),

and developing technical reports for drug products.

- Liaised with internal analytical, scientific and other pharmaceutical companies to meet project goals.
- Experience working with TMF (trial master file), Veeva vault platform, Electronic Lab Notebook (ELN), eTMF (Electronic Trial Master File) Outlook, SharePoint, and JMP.
- Experience in measuring technical/scientific attributes in qualitative ways and drive science-based decisions across the organization.
- Proficient with data mining, data analysis, literature review, medical writing and authored technical documents.
- Used JMP to analyze results obtained from characterization of drug batches (from release, stability and in process samples), trend analysis on deviations from different parameters during upstream and downstream manufacture of drug substances
- Knowledge of CMC and regulatory requirements, including the development of process and product specifications and writing and reviewing process development reports.
- Reviews the compliance of microbiological data to the specifications and GMPs as part of data re view and trends these data for investigations.

Postdoctoral clinical scientist

UNIVERSITY OF NEVADA LAS VEGAS

09/2017- 06/2018

- Managed clinical trials focused on PMTCT (Prevention of Maternal to Child Transmission) of HIV to offspring through screening and administering HIV tests, and testing men to decrease transmission rate.
- Worked on grant project called Men's club, a subset of iSTAR (Intervention for sustained testing and retention) grant focused on the impact of male partner involvement and support on initiation and upkeep of breastfeeding in HIV positive postpartum women.
- Managed clinical research investigating the effect of exclusive breast feeding (EBF) in decreasing the rate of HIV transmission from mother to infant.
- Screened patients for inclusion in clinical trials.
- Involved in a phase II-III clinical trial involving data, and budget management, risk analysis.
- Monitored clinical studies, study sites, enrollment updates, preparation and administration of informed consent.
- Clinical site feasibility set up that include training of research staff, access to patients, SIV of 7 sites.
- Managed research assistants involved in various levels of the research from subject enrollment to intervention and data analysis.
- Monitored and updated RPPR (Research Performance Progress Report) and participated in budget planning and amendments.
- Maintained relationships with stakeholders and other organizations involved in the studies.
- Supervised and mentored research staff such as research assistants on methodology, analysis and importance of data accuracy, completeness, integrity, and report updates.
- Reviewed clinical data for specific trends, and mined data.
- Experience in performing review of clinical trial data (CTMS) in order to identify trends in safety or efficacy data.
- Experience with data listing review and EDC (RedCAP) systems.

- Involved in epidemiological and outcome research study of infectious diseases.
- Part of trial team that designed clinical trial protocol, maintained compliance to research activities and budget adjustment.
- Contributed to the development and maintenance of up-to- date SOP procedures
- Presented regular research updates to project teams
- Networked with institutions or organizations on future potential studies
- Drafted informed consent forms (ICF), case report forms (CRF), study protocol sections, narrative writings and reviewing trial master files (CTMS like Oracle clinical) for quality.
- Budget tracking and forecast projecting.
- Approve queries by clinical data review group, support clinical summary writing (DSUR, CSR, amendments to protocol etc.) by ensuring correct data is captured in these reprts and the description of AE are acceptable.

- Provide guidance and review of medical data, reconciliation of adverse events between sponsor and site databases, train research staff on reporting adverse events/events of clinical interest.
- Participated in vendor selection, management and review of scope of work (SOW).
- Site visited to ensure staff adherence to research procedures, ensure excellent quality of research results for analysis.
- Communicate directly with team members to define issues in a transparent and collegial manner. Proactively establish productive working relationships with peers and cross-functional partners.
- Maintained timely contact with the study facilities, investigators, coordinators, client personnel, and other individuals involved in clinical trials.
- Monitored studies ensuring that all are compliant with clinical protocols and ICH/GCP guidelines.
- Provided regular updates of and submission of IRB protocol to prevent research misconduct
- Provided updates on research study and future business endeavors.
- Data cleaning experience.
- Conduct literature searches in databases such as EMBASE and PubMed/Medline.
- Reviewed study results, cleaning where necessary and interpretation.
- Participated in site monitoring to ensure research assistants adherence to clinical protocols, data management, implementation of corrective actions in case of any issues of compliance
- Participated in developing and reviewing SOP (standard operating procedures) of research study progress.

Graduate Research Assistant
ALABAMA A AND M UNIVERSITY Huntsville, Alabama
01/2015 – 07/2017
Accredited Member of the Southern Association of Colleges.

- Conducted biochemistry laboratory research developing chemical assays to study the antioxidant and anticarcinogenic potential of allspice extracts.
- Conducted in vivo oncology studies using Fisher 344 mouse models and in vitro studies using colon cancer (CaCO2) and hepatic cancer (HepG2) cells in a mammalian cell culture lab (BSL2) to determine the effects of phytochemicals on colorectal and hepatic cancer.
- In vitro diagnostic (IVD) experience working with animal models on colon cancer and different cancer cell lines in a cell culture lab.
- Handled animals while adhering to approved laboratory animal procedures and techniques.
- Designed study and experiments to determine the antioxidant and anticarcinogenic effects of

allspice.

- Conducted different antioxidant, anti-inflammatory and cytotoxic assays using HapG2 and CaCO2 cells.
- Adhered to IACUC guideline when handling animals (Fisher 344 male rats).
- Extracted and studied tissue samples from animals to investigate the progression and metastasis of colon cancer.
- Served as teaching assistant and mentor to undergraduate students.
- Graduate representative and collaboration with other students in a lab setting
- Supervised and mentored undergraduate students
- Over 3 years of laboratory experience with image analysis and use of computer programs and multiplex assays.
- Worked (40% of time) in the biotechnology lab with different bacterial species and plasmids introducing different sequences that are drug resistant for isolating these organisms.
- Experience with Protein Expression and Purification, Molecular Cloning, Site-directed Mutagenesis, Size Exclusion Chromatography, Liquid Chromatography, Gel Electrophoresis, Mass Spectrometry, Capillary Electrophoresis, Chromatography, and documentation report preparation.
- Over 3 years of experience working in a BSL2 cell culture and animal lab while adhering to current GLP
- Experience with human and animal tissue sampling, section and processing.
- Experience with digital image analysis, planning and conducting experiments conducive with timelines of ongoing research projects.
- Experience in working in a GXP environment with emphasis on GCP, GLP, and GMP
- Over 3 years of experience working with deep-well plates
- Conducted experiments using different laboratory equipment's and techniques such as Immunohistochemical biomarker assays techniques (ELISA), HPLC, cellular isolation and cell cytotoxicity analysis using different assay techniques.
- Developed manuscripts and abstract for publication in scientific journals.
- Some of the biomarkers I've analyzed include LDH, Caspase 3 release, antioxidative enzyme release, bone biomarkers such as alkaline phosphatase and minerals.
- Experience in cancer biology and immunology working with different cancer cells and in vivo tissues samples

Clinical research scientist
SOUTH CAROLINA STATE UNIVERSITY Orangeburg, South Carolina
02/2012 – 05/2014
State Land Grant College providing student education and training services.

- Research scientist to a primary investigator providing treatment for elderly diabetic patients.
- Managed research staff on clinical interventions and data analysis investigating the effect of diet and exercise on blood lipid profile in elderly type II diabetics.
- Patient screening and recruitment and managing data analysis, budget justification and setting up meetings between research staff and supervisor.
- Contribute to the development of clinical protocols and other clinical documents, in close collaboration with cross-functional team members and external vendors.
- Analyzed blood work of patients (Glucose, Insulin, HgbA1C, lipid profile)
- Introduced exercise intervention procedures to target elderly type two diabetes that can improve patient disease condition and blood lipid profile.
- Involved in site initiation visits (feasibility), setting up protocol to ensure compliance of key personnel to regulatory authorities.
- Conduct literature searches in databases such as EMBASE and PubMed/Medline.
- Recruited patients that were eligible for the study and observed their medical records during the study to see if they could continue through the duration of the study.
- Cardiology experience in reading ECG and performing exercise stress test to determine patient

eligibility to take part in the study.

- Budget tracking and forecast projecting.
- Performed study participant interviews, dietary recalls, and analyzed data utilizing SAS statistical software.
- Promotional review of literature on different nutritional interventions to improve lipid profile in elderly type II diabetics.
- Data cleaning experience.
- Conducted literature review as needed and drafted clinical narrative writings.
- Presented research results at medical conferences.
- Provided education on the benefits of dieting and exercise to control diabetes.
- Trained and mentored clinical research staff to operate equipment including HUMAC Norm and bio-impedance machines.
- Consulted patients on dietary modifications to speed up the recovery process and prevent diabetes complications.
- Experience revieing data and analysis using platforms such as EDC InForm and JReview.
- Involved in a phase II-III clinical trial involving data, and budget management, risk analysis.
- Provided significant improvement of blood glucose and increased patient's muscle mass.
- Work with subjects to ensure their compliance to protocols of the study.
- Participate in subject recruitment and retention
- Experience with EDC (Electronic Data Capture), and CRF, and J-Review for reporting and analyzing clinical data.

Clerkship / Rotations
UNIVERSITY OF DEBRECEN, MEDICAL / HEALTH SCIENCE CENTER Debrecen, Hungary
02/2011 – 05/2011
Oldest running higher education institution in Hungary and ranked one of the top 700 universities in the world.

- Studied as medical student and performed clinical rotations in psychiatry, neurology and ophthalmology departments.
- Learned disease diagnosis and treatment procedures.
- Developed thesis on the use of fluorescence angiography for diagnosing intraocular tumors and initiate treatment.
- Researched procedures for diagnosing and treating intraocular tumors.
- Screened subjects with fluorescence angiography to study effectiveness for diagnosing specific intraocular tumors.

Clerkship / Clinical Rotations
UNIVERSITY HOSPITAL OF WALES Cardiff, Wales
10/2010-02/2011
Third largest hospital in the UK and the largest hospital in Wales.

- Performed clinical rotations within the pediatrics, obstetrics and gynecology departments.
- Reviewed patients and reported findings to the attending physician.
- Scrubbed into coronary artery stent placement procedures
- Gained hands on experience in working with patients and diagnosing diseases.

PRESENTATIONS

"Antioxidant Potential of Water and Ethanol Extracts of Allspice" 2016
Southeastern Section of the Institute of Food Technologist

"Antioxidant Potential of Water and Ethanol Extracts of Allspice," 2016
Alabama A&M University STEM Day

"Anti-Obesity Effect of Sorrel Calyx Extracts on 3T3-L1 Adipocyte Cells." 2015
Institute of Food Technologists

"Effect of Resistance Training on Muscle Strength and Endurance Level in Elderly Type 2 Diabetics"
2013. The 71st Professional Agricultural Workers Conference

"Effect of Resistance Training on Muscle Strength and Endurance Level in Elderly Type 2 Diabetics"
2013. The 17th Biennial Research Symposium.

"Effect of Resistance Training on Muscle Strength and Endurance Level in Elderly Type 2 Diabetics"
2012. The 70th Professional Agricultural Workers Conference.

ARD Symposium 2017. 18th Biennial Research Symposium. Antioxidant Potential of Allspice
2017. (Oral Presentation).

ARD Symposium 2017. 18th Biennial Research Symposium. Chemopreventive Potential of
Allspice in Azoxymethane (AOM) treated Fisher 344 Male Rats (Poster Presentation)

Accepted for Poster Presentation at CUGH (Consortium of Universities for Global Health) 2018

- Partner Awareness of HIV Status Among a Cohort of HIV-Infected Women
- The impact of ticketing on improving viral load uptake: Results of a pilot project in Nigeria
- Locating the Epidemic- Use of Mobile APP for Targeted Hotspot HIV Testing Services (HTS)

AWARDS

Achievement award on the 18th Biennial Research Symposium 2017 (Oral Presentation) 2017

PROFESSIONAL CERTIFICATIONS

Certified Clinical Research Professional (CRC) 2014
CRA Training Institute, Houston, Texas

Hazard Analysis and Critical Control Point Certification 2015
International HACCP Alliance

Collaborative Institutional Training Initiative Program Certification 2015

Basic Life Support (BSL) certification 2018

SKILLS & ATTRIBUTES

Data Management
Statistical analysis
Clinical research

Clinical Operations
Medical knowledge and terminology
Teaching and mentoring
Study and site management
Excellent written and verbal communication skills and teamwork
Diet recalls
Clinical Study Reports
Cell culture models
Clinical trial operations (GCP)
Team Leadership / Motivation
Excellent communicator
Dietary interventions and recalls
In Vitro / In Vivo Assays/Analysis
ICH, GCP, FDA, TPD Regulations
FDA Regulations
Clinical Trial Monitoring
Microsoft office
Data analysis with excel, SAS, STATA
Research design and scientific concepts
Training research staff
Leadership skills
Independent work
Publications
Patient recruitment
Drafting protocols and conflict of interest forms
Critical thinking and delivering of objectives
Facilitate and initiate enrollment in clinical trials
EDC (Electronic Data Capture) and REDCap
Communicating with stakeholders
Graph pad and Prism experience

AFFILIATIONS

- Alabama A and M University
- South Carolina State University
- University of Debrecen, Medical and Health Science Center
- HonorSociety.org member
- Institute of Food Technologist Membership
- American Red Cross membership
- USDA High School Mentorship

MEDICAL RESEARCH SKILLS

- Data analysis
- Protocol development and implementation
- Informed consent administration
- Data mining
- Publications
- Screening
- Research
- Clinical site monitoring
- Good clinical practice
- Organizational skills
- Skilled multitasker

COMPUTER SKILLS

- Microsoft Office Suite (excel, PowerPoint, word)
- SAS Program
- Adobe Acrobat

LANGUAGES

- English
- Hungarian
