Job Title:	Clinical Development Associate Director		
Department:	Clinical Research	**Location:**	Hybrid / Raleigh-Durham, NC or Hybrid / Stamford, CT
Reporting to:	Head of Development	**Salary Range:**	$152,000,000 – $200,000.00

Overall Job Summary:

As the integral member of the study team and program development team, the Clinical Development Associate Director will be responsible the design and execution of clinical trials within the SpringWorks clinical programs in oncology and rare diseases. In addition, the Clinical Development Associate Director is responsible for the design, preparation, implementation and reporting of clinical study protocols in all phases of development. The Clinical Development Associate Director will work closely with Clinical Operations, Clinical Pharmacology, Data Management, Pharmacovigilance, Field Medical and Biometrics to help manage the clinical trials at SpringWorks.

Location Classification – Hybrid:
This role will be required to work onsite 2 days a week (Tuesday and Wednesday), or more depending on business needs.

Essential Duties and Responsibilities:

- The responsibilities of the Clinical Development Associate Director during the clinical trial life cycle will include, but are not limited to the following activities:
- Design and writing of protocol, CRF, data management plan, statistical analysis plan, and endpoint centric study manuals
- Lead the following activities in the areas related to the Clinical Scientist's expertise (e.g., response evaluation, biomarker assessment, imaging, etc.)
    - Selection and management of clinical study support vendors and clinical study sites with respect to functional capabilities related to pertinent endpoints and study procedures
    - Engagement and education of investigators (e.g., Investigators' Meeting, Site Initiation Visit, data reviews)
    - Lead data querying during the clinical trial conduct and support external data reconciliation (Biomarkers, Imaging, etc.)
    - In collaboration with Data Management and Medical Monitor, prepare the data review plan and perform data reviews using patient profiles or other reporting formats and tools
    - Assessment of reported protocol deviations and trends and potential study impact
    - Preparation and conduct of meetings to review clinical trial results (e.g., cohort review, DMC, Steering Committee)
    - Analysis and interpretation of clinical trial results and trends including preparation of the clinical study report and associated abstracts and/or publications
- The responsibilities of the Clinical Development Associate Director at the program level will include, but are not limited to, providing guidance and input to the following documents in the areas related to expertise (e.g., response evaluation, biomarker, or imaging strategy):
    - Investigator's Brochure
    - Clinical Development Plan, with particular emphasis on the Biomarker and Imaging strategy and analysis plan
    - Regulatory submissions
    - Publication strategy and plan for the program or therapeutic area
    - Individual publications and other scientific/clinical information aligned with the overall program strategy
- Ensure consistent practices in the conduct and management of scientific approaches across trials and programs, as needed
- Maintain their own and departmental awareness of scientific information
- Evaluate therapeutic area innovation and competitive landscapes
- Perform other duties and responsibilities as assigned.

Education and Experience:

- Education: Doctoral Degree Required (PhD, PharmD, etc.)
- 7 years clinical trial research experience in pharmaceutical and/or biotechnology industry
- Postgraduate research experience preferred

- Oncology therapeutic area preferred
- Ability to lead, influence and shape scientific planning, conduct and analysis in alignment with the applicable program strategy
- Well versed in critical review of scientific information with good working knowledge of GCP and ICH guidelines.
- Understanding of steps required to set up and successfully manage delivery of all phases of studies.
- Excellent interpersonal skills with proven high performance in a study and program team matrix.
- Embody the SpringWorks Values to act with empathy and humility to drive a culture that takes ownership and accountability for their individual and teams' performance.
- Strong interpersonal communication skills to collaborate with colleagues, stakeholders, and vendors effectively and clearly in a remote hybrid work environment.
- Ability to travel occasionally including overnight stay driven by business need.
- Relocation assistance available.

SpringWorks Leadership Principles:

- Change Steward - Recognize that change is essential; set goals that align to the Company's strategy and create positive momentum for change; adapt business practices as necessary to adjust to ever changing requirements
- Excellence Driver - Drive high performance and ownership through an open dialog; recognize performance, empower teams and create accountability for results
- Growth Coach - Set clear expectations, provide frequent feedback, coaching, and encourage continuous learning; leverage individual strengths to help SpringWorkers unleash their potential and grow in their jobs and careers
- Community Builder - Establish connections with others to build strong teams that trust each other and are great at collaborating to achieve goals; create a diverse, inclusive, and psychologically safe environment
